**FOR IMMEDIATE RELEASE**

**MARIO ANDRETTI RACING SCHOOL & JEFF GORDON RACING SCHOOL RIDE ON HIGH-PURITY NITROGEN  
FROM PURIGEN98™**

**SUNRISE, Fla.** – (May 7, 2008) – Mario Andretti Racing School and Jeff Gordon Racing School have entered into exclusive agreements with Sunrise, Florida-based N<sub>2</sub>Revolution, Inc. to use its Purigen98™ tire inflation system. Purigen98™ offers the same high-purity nitrogen gas that NASCAR and IndyCar Series drivers use in their tires when racing.

The high-purity nitrogen tire inflation gas from Purigen98™ will be the only thing that goes into the tires of cars at the Mario Andretti Racing School and Jeff Gordon Racing School, which operate NASCAR and Indy-style race car driving experiences at 16 tracks across the United States.

For years, professional racers, airlines and even NASA have relied upon tires filled with high-purity nitrogen to enhance handling, stability and tire wear as well as overall safety. Today, Purigen98's™ high-purity nitrogen tire inflation is available to consumers at better car dealers, tire stores and auto service facilities nationwide.

"We are thrilled that Mario Andretti Racing School and Jeff Gordon Racing School chose the Purigen98™ tire inflation system over all others," said Purigen98™ President Robin Pearl. "Safety and reliability are paramount when dealing with the public, especially behind the wheel of high-speed race cars, and it's great to know they want us along for the ride."

But Purigen98™ is not just for those with an urge for speed. Nitrogen-filled tires can help lessen the carbon imprint on Mother Earth by reducing fuel emissions and the harvest from rubber trees. Nitrogen molecules are more stable than those of oxygen so the gas doesn't leak through the walls of tires as quickly, helping motorists maintain proper tire pressure. With properly inflated tires, drivers find they save three percent or more on fuel costs and enjoy better handling, braking and vehicle stability. Tire wear also is reduced, which can result in significant savings on replacement costs.

**About Purigen98™**

N<sub>2</sub>Revolution, Inc., based in Sunrise, Fla., develops and manufactures leading-edge automotive solutions, with Purigen98™ as its flagship product. Led by a team of distinguished veterans from the automotive, environmental, financial, engineering and scientific industries, the company is committed to developing high-quality, affordable, environmentally friendly products that enhance the quality of life for today's sophisticated consumers. N<sub>2</sub>Revolution has been recognized with the Emerald Award from Broward County, Fla., in the category of Innovative Procedures / Process Improvement and has been featured in news reports by MSNBC and numerous broadcast and print media nationwide.
